With IDBLUE[®] RFID Reader

Mesa[®] Takes On the Power of RFID

The world's toughest rugged notepad has joined forces with the IDBLUE[®] RFID reader to bring you the ultimate asset management and tracking tool. Use the IDBLUE reader alongside your Juniper Systems handheld to do what barcode scanning can't—quickly capture data-rich readings in extreme environments.

1132 West 1700 North, Logan, Utah 84321 USA

Mesa® with IDBLUE Reader

Rugged Data Capture

When paired with your rugged handheld, the IDBLUE reader improves efficiency by allowing you to read and write data on RFID tags at record-pace. By design, the IDBLUE reader is rugged enough to even keep up with Juniper Systems handhelds, and on top of that, it has a pending Class I, Division 2 certification for hazardous locations. With its ergonomic, pen-shaped design, the IDBLUE reader can double up as both RFID reader and stylus, making data capture smooth and effortless.

The IDBLUE reader is a cost-effective addition to the Mesa, giving you the RFID capabilities you want, in a package that gives you future flexibility. You can rest easy with this adaptable RFID option, because even if you upgrade handhelds or change software, there's no need to invest in new RFID equipment.

The IDBLUE reader is compatible with any asset management software for Windows Mobile 6/Windows Embedded Handheld 6.5 and will work seamlessly with any Bluetooth®-enabled Juniper Systems handheld. It is available in both HF (13.56 MHz) and UHF (860 MHz – 960 MHz), depending on your data collection needs.

Contact Juniper Systems at sales@junipersys.com to try out a demonstration product.

About Juniper Systems

Juniper Systems, Inc. designs and manufactures rugged handheld computers and provides field data collection solutions for use in extreme environments. Since 1993, Juniper Systems has provided innovative mobile technology to industrial, agriculture, natural resources, geomatics, public works, and military markets. Renowned for a history of unsurpassed quality and ruggedness, Juniper Systems offers long-term reliability, excellent customer service, and product customization opportunities.

About IDBLUE

IDBLUE is a leading provider of ultra-mobile HF and UHF RFID Bluetooth® readers for the smartphone and tablet market. IDBLUE's product line is designed to add value to any organization's mobility infrastructure by offering low cost, high performance, scalable RFID readers. Adoption of IDBLUE occurs in healthcare, retail, utilities, aerospace, oil and gas.
